EMERGENCY DOORS AND ESCAPE HATCH VANDALOCK OPERATION D303200000

Description

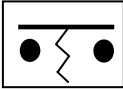

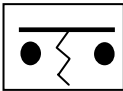

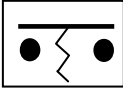

D303200000

- Vandalock is enabled whenever the keyswitch is in the IGN (Ignition) or ACC (Accessory) positions.
- The Panel Buzzer and the corresponding door buzzer will sound if any Emergency Door is locked
- The Panel Buzzer will sound if the Escape Hatch is locked
- The Starter circuit will interrupt whenever any Emergency Door or Escape Hatch is locked.

Note

1. "IGN_STATUS" has been used to represent keyswitch positions IGN (Ignition) and ACC (Accessory).
2. Each Vandalock switch is optional and is "Active High".
3. This software can be used with any single or combination of Vandalock options.
4. State transition timing issues have not been considered in the simulation.

Inputs

SYSTEM INPUT	TYPE	FUNCTION	NETWORK ID		
			MUX DEVICE	CONNECTOR	PIN
SW_REAR_LOCK (Door Unlock State) 	INPUT SPST:(Pin Switch) <ul style="list-style-type: none"> • Vandalock Switch Located on Rear Emergency Door Latch Assembly 	<ul style="list-style-type: none"> • Switch passes GND to M2/B2 Electronic Components when door is locked. 	CHM	C5	B
SW_LS_LOCK (Door Unlock State) 	INPUT SPST:(Pin Switch) <ul style="list-style-type: none"> • Vandalock Switch Located on Left Side Exit Door Latch Assembly 	<ul style="list-style-type: none"> • Switch passes GND to M2/B2 Electronic Components when door is locked. 	EXM1	C5	G
SW_RS_LOCK (Door Unlock State) 	INPUT SPST:(Pin Switch) <ul style="list-style-type: none"> • Vandalock Switch Located on Right Side Exit Door Latch Assembly 	<ul style="list-style-type: none"> • Switch passes GND to M2/B2 Electronic Components when door is locked. 	CHM	C5	F
SW_HATCH_LOCK (Hatch Unlock State) 	INPUT SPST:(Pin Switch) <ul style="list-style-type: none"> • Vandalock Switch Located on the Escape Hatch Latch Assembly 	<ul style="list-style-type: none"> • Switch passes GND to M2/B2 Electronic Components when door is locked. 	EXM1	C5	F
ACC	INPUT <ul style="list-style-type: none"> • Vehicle Ignition Switch in ACC position. • 0=OFF, 1=ON 	<ul style="list-style-type: none"> • Notifies the controller that the ignition switch is in the ACC (Accessory) position. 	BHM	B6	A1
IGN	INPUT <ul style="list-style-type: none"> • Vehicle Ignition Switch in IGN position. • 0=OFF, 1=ON 	<ul style="list-style-type: none"> • Notifies the controller that the ignition switch is in the IGN position. 	BHM	B6	A3

EMERGENCY DOORS AND ESCAPE HATCH VANDALOCK OPERATION

D303200000

State Diagram

The "Transition" state is included to allow for simulation utilizing minimum transitions.
